

MESSAGE

It gives me immense pleasure that IAAPC, Delhi Chapter has been decorated with new executive members who are leaders and experts in Air Quality Management. I on behalf of the IAAPC DC take this opportunity, to welcome all the newly elected Executive Committee Members for their successful tenure. I also wish to place my sincere gratitude to all my predecessors EC members for their remarkable contribution and noted endeavours due to which IAAPC stands well recognized in the fraternity. With the constitution of the new Executive Committee of IAAPC DC, it has taken a powerful stride towards Air Quality and Air Pollution related issues and its linkages with Climate Crisis & Mitigation. Clean Air for blue skies is a reminder that healthy air and a healthy planet, both can go hand in hand. We all breathe the same air and therefore we all have a role to play in protecting it.

We at IAAPC believe that it is our prime responsibility to continue being involved in providing sustainable solution to the challenging Air Pollution problems and develop robust environmental solutions that target productive and sustainable use of natural resources besides providing recent update on current technological developments, innovations including regulatory issues.

The IAAPC will continue to reap even more fruitful achievements in times to come through untiring efforts of its dedicated members. Further, to address and implement air pollution prevention minimization programs in urban and industrial sectors, IAAPC shall focus on promoting Government and Private sector initiatives and strengthen local, regional and national capabilities on Air Quality Management.

I hope that with the support of collective action and with the help of valued Stakeholders and our society at large, IAAPC will rise in defining the path to address emerging environmental challenges. The focus of IAAPC will be to develop end to end solutions for the challenges of Air Quality Management.

I am sure that IAAPC DC's present team will contribute and lead the challenges of Air Quality Management in the country and be instrumental in bridging the gap so as to help in taking effective decisions for Air Quality Management Program for the country by policy makers, planners and regulators.

Dr. J. S. Sharma

PRESIDENT, IAAPC-DC
